

Harmonic Filters Matrix[®] AP

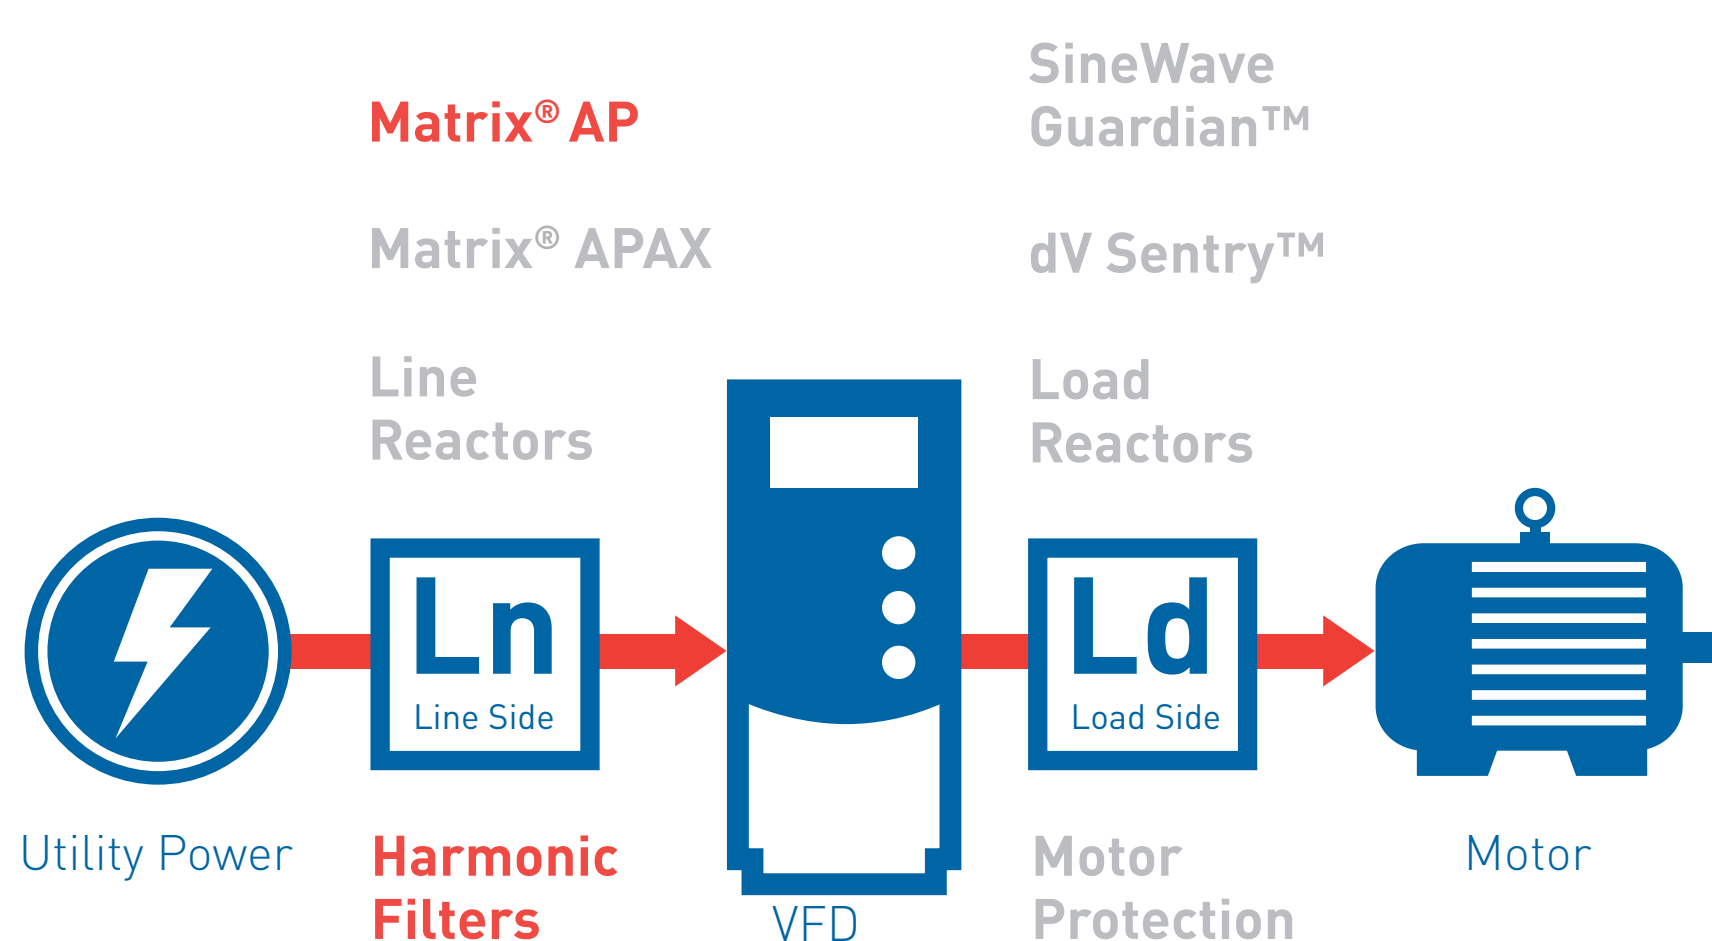

Adaptive Passive Technology for superior harmonic mitigation at varying loads

- Adapts to varying power loads
- Best performance in the industry
- Extends the service life of electrical equipment
- Generator compatible
- Performance guarantee

The key to success: adapt.

The best-in-class Matrix[®] AP Harmonic Filters can be specified for use on the input of your VFD or other 6-pulse rectifier power supply to enable your system to meet the IEEE-519 requirements for harmonic distortion, regardless of power load.

Power quality.
Solved.
